03. Pioneering Sustainable Agriculture, Blue Swallow 2019 organized by Vietnam Chamber of Commerce and Industry (VCCI), Vietnam Union of Science and Technology Associations (VUSTA), UNDP and CSIP

WHO WE ARE?

ABOUT
US

Nguyen Khoi Green Jsc. are an **emerging** company producing natural & organic pork, processed meat, herbal tea, healthy snack & more.

Our Vision

To promote and support True Wellness and respect for all Beings in harmony with Nature by developing sustainable farming and consumption communities.

Our Mission

To be a trustworthy innovator in providing healthy and organic products and solutions for healthy living.

Our Commitment

- Absolute commitment to quality
- Respect and devotion to Mother Nature
- Business model that benefits all

CORE TEAM

Nguyen Luong Quyet, Eng.
CO-FOUNDER & CEO

4 years in circular economy in organic farming
7 years in F&B industry
10 years infrastructural engineering

Nguyen Phuong Thao, Msc.
CO-FOUNDER & COO

4 years in circular economy in organic farming
10 years in environmental sciences and climate change
University of East Anglia graduate

WHAT WE ARE DOING?

CORE SERVICES

Farming activities

Farming activities sustain the health of soils, ecosystems and people, treat animal with care and respect.

WHAT WE ARE DOING?

CORE SERVICES

Restaurant

Serving foods with main ingredients from our farms.

Food retail

Selling the products directly from our farms

Technology tranfer

To transfer the technology of sustainable farming approach.

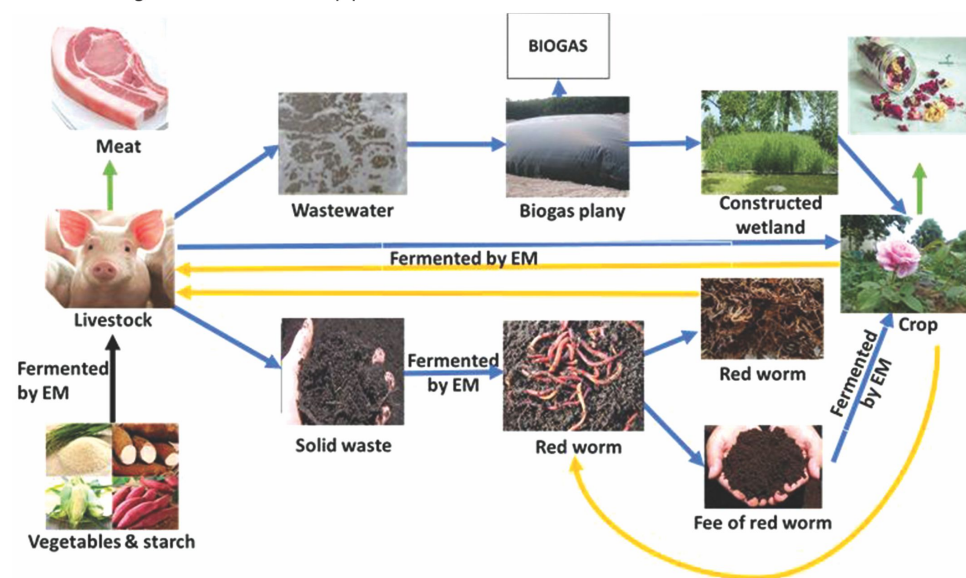

PIONEERING IN CIRCULAR ECONOMY IN AGRICULTURE IN VIETNAM

NGUYEN KHOI GREEN JSC. has developed the first Circular Organic Agriculture Model in Vietnam. It is an innovative approach to keep the nutrient cycle closed for the environment and agriculture's benefit, making use of modern technologies at a higher level.

In this model, both crop and pig husbandry are practiced on farm. Residual flows from livestock and crop production are produced for animal feed, fertilizer in the circular chain. Pig's manure and sewage is separated into solid and liquid form, towards the circular process:

- Sewage is treated by biogas plant primarily and constructed wetlands sequentially. Water discharge after treatments is used for watering. Biogas collected from biogas plant is used for heating and cooking. Plants from constructed wetlands is to feed livestock.
- Solid waste mixed with crop residues fermented by Effective Microorganisms (EM) is to feed earthworm. Earthworm are high-grade protein source of livestock feed and earthworm's manure is a nutritive organic fertilizer for crop plants.

- Consecutiveness
- Circulation
- Product diversity
- Simple operation

PIONEERING IN CIRCULAR ECONOMY IN AGRICULTURE IN VIETNAM

Circular organic agriculture model is the pioneer in circular economy in agriculture in Vietnam. The model has proven its sustainability in its application in our farming activities.

SUSTAINABLE BENEFITS

Environmental - friendliness

- Zero – agriculture waste
- Minimization of fossil fuel use.
- Reduction of 9,96 tCO₂/year

Economic efficiency improvements

- Reduces 28% animal feed cost
- Reduces 40% organic fertilizer cost
- Reduces 50% watering amount
- Improves market values of agroproducts
- Produces at least 03 product categories

Farmer - friendliness

- Simple
- Applicable operation
- Low operating cost
- Less uncertainties.

SUSTAINABLE FARMING COMMUNITY

SUSTAINABLE
COMMUNITY

A community is the place that people share the common goals. At the sustainable farming community, all the members work together for nature's hamony, environment protection, animal welfare and people's health.

At NGUYEN KHOI GREEN JSC., we are proud to develop the Circular Organic Agriculture Model for the commitment of developing the sustainable farming community that benefits all.

SUSTAINABLE FARMING COMMUNITY

SUSTAINABLE
COMMUNITY

One greatest thing about farming in Circular Organic Agriculture Model is that we are bringing the better and tastier food for people, a cleaner environment and a happier farmer.

Once buying products of Circular Organic Agriculture Model, the consumer is showing the interest of sustainable consumption. A group of like-minded people working toward a common goal can together forms a sustainable consumption community.
